A Word About Verbatim LED Bulbs

Retrofit light bulbs are now available to replace most incandescent and CFL bulbs. The efficiency of an LED bulb is approximately five times that of a standard incandescent bulb, so that even though the initial cost of an LED lamp is higher than the incandescent type the additional cost is more than recovered through the lower energy usage and much longer life of the LED bulb. LED lamps are also environmentally friendly because they lessen the need for power generation and do not contain hazardous materials such as mercury.
