## Product Description

The **SOLITRON** Solid State Contactor is designed for industrial heating and motor control applications.

The Solid State Contactor is capable of switching 1-, 2-, and 3-phase applications with loads up to 63 A AC1 load and up to 24 A AC3 load. The Solid State Contactor is designed for DIN-rail mounting with integrated heatsink and overvoltage

protection. The heatsink is moved to the front for optimal convection cooling in the panel. Cable ducting system will not stop the airflow.

The contactor elements are soldered directly on to the direct copper bonded substrate (DCB-technology). AC or DC controlled versions are available. Built-in LED status indication for applied control voltage.
